

Figure 1: Drill hole location plan, showing copper-percent equivalent results to date and the traces of existing and planned drill holes.

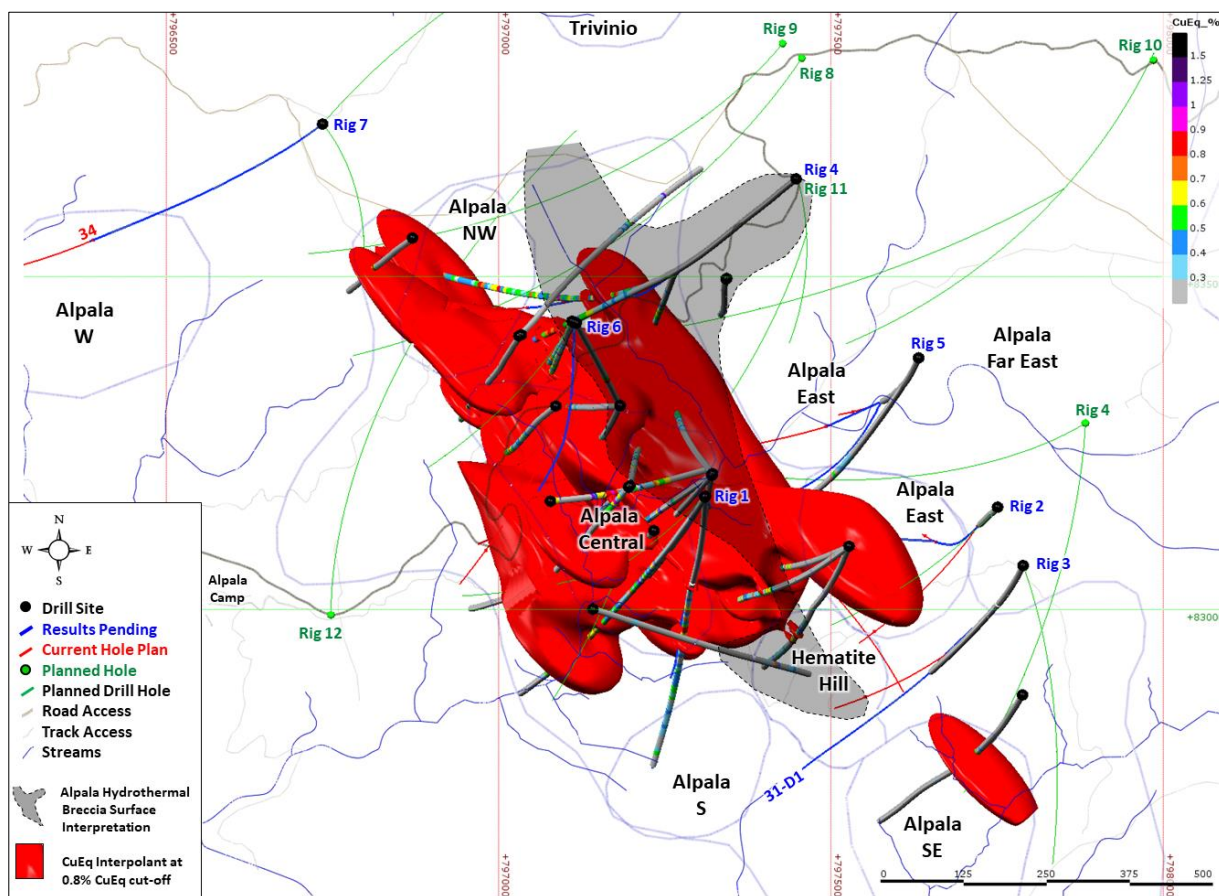

Figure 2: Drill rig and drill hole location plan, showing the Alpa Deposit, defined by the 0.8% copper-percent equivalent cut-off grade-interpolant, and the Alpa Hydrothermal Breccia. The drill traces are color-coded by copper-percent equivalent results. The traces of existing and planned drill holes are also indicated.
