

Figure 1: Drill hole location plan at Alpala, showing copper-percent equivalent results to date and the traces of existing and planned drill holes.

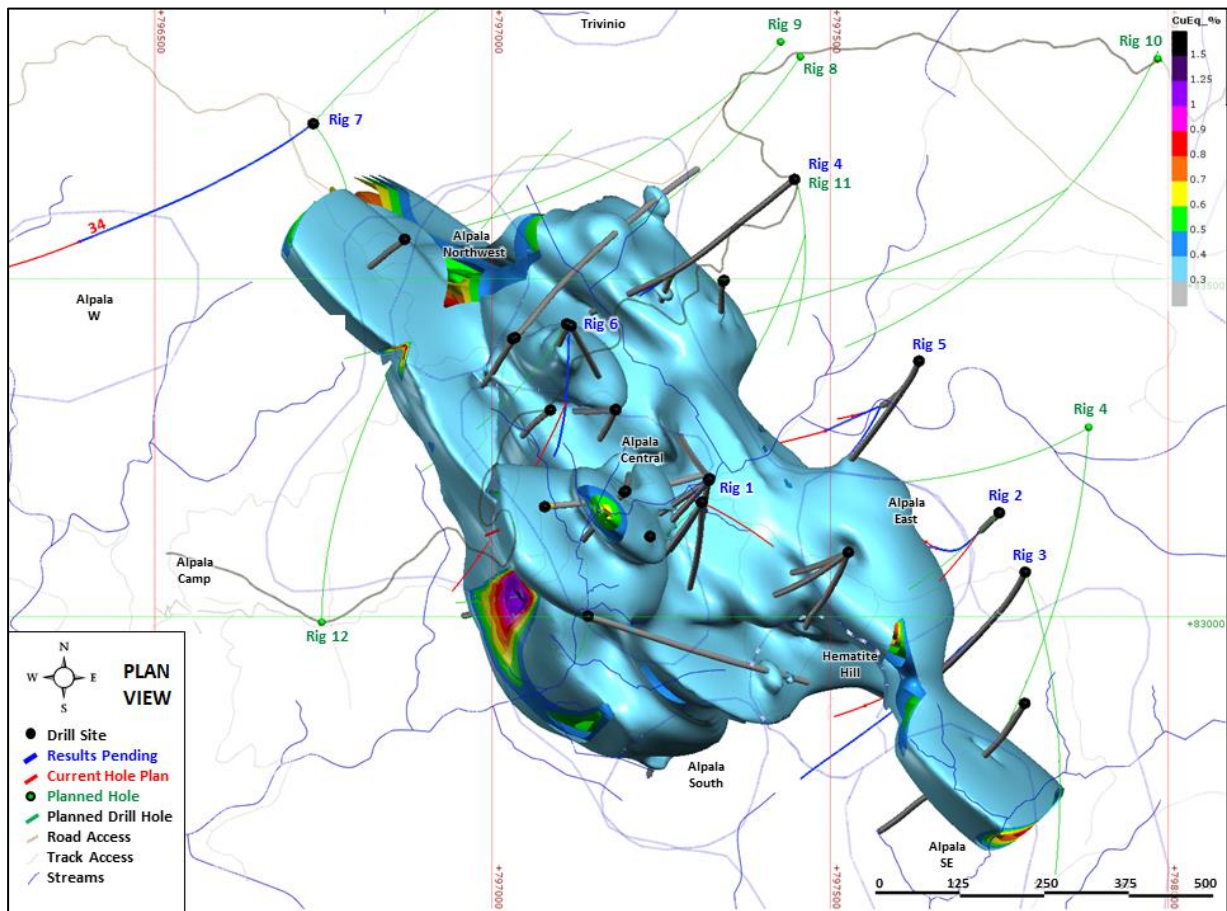

Figure 2: Plan view of the Alpala deposit showing CuEq cut-off grade shells from >0.3% CuEq to >1.5% CuEq. Drilling indicates a true width of the mineralized envelope at 0.3% CuEq cut-off grade, of up to 700 metres, a length in excess of 1300 metres and over 1800m vertical extent from surface.

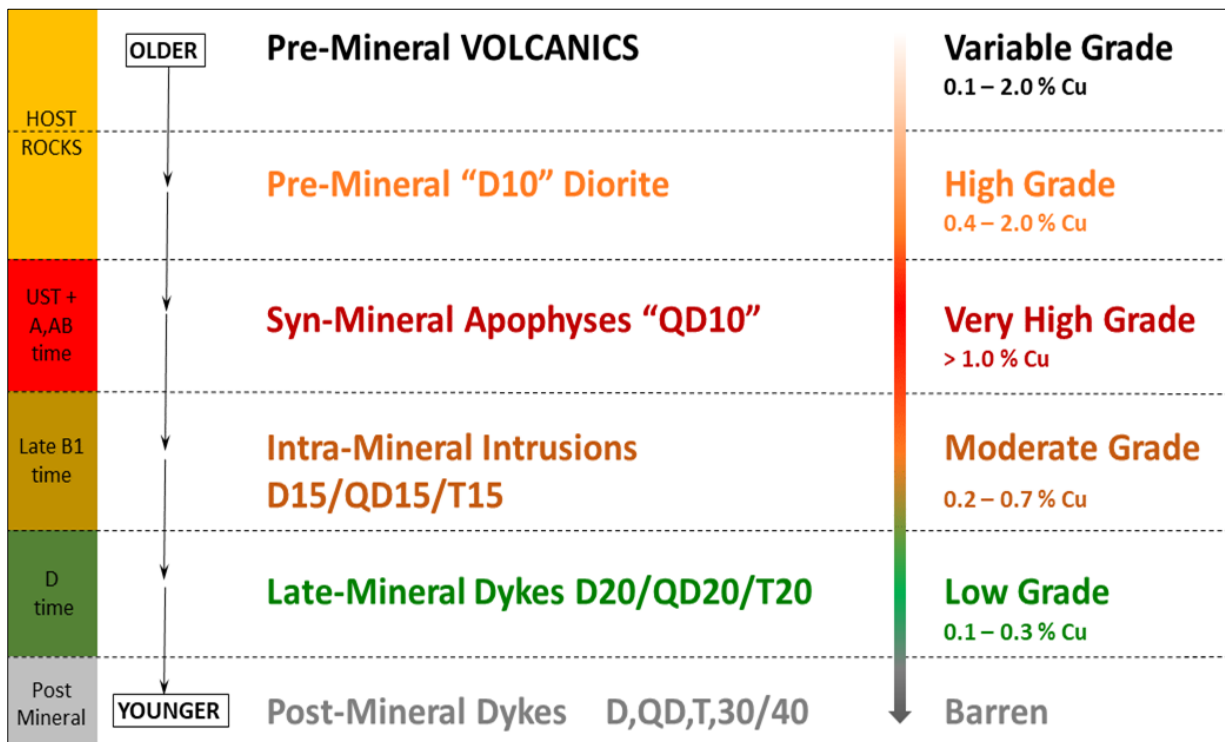

Figure 3: Geological units of the Alpala Deposit.

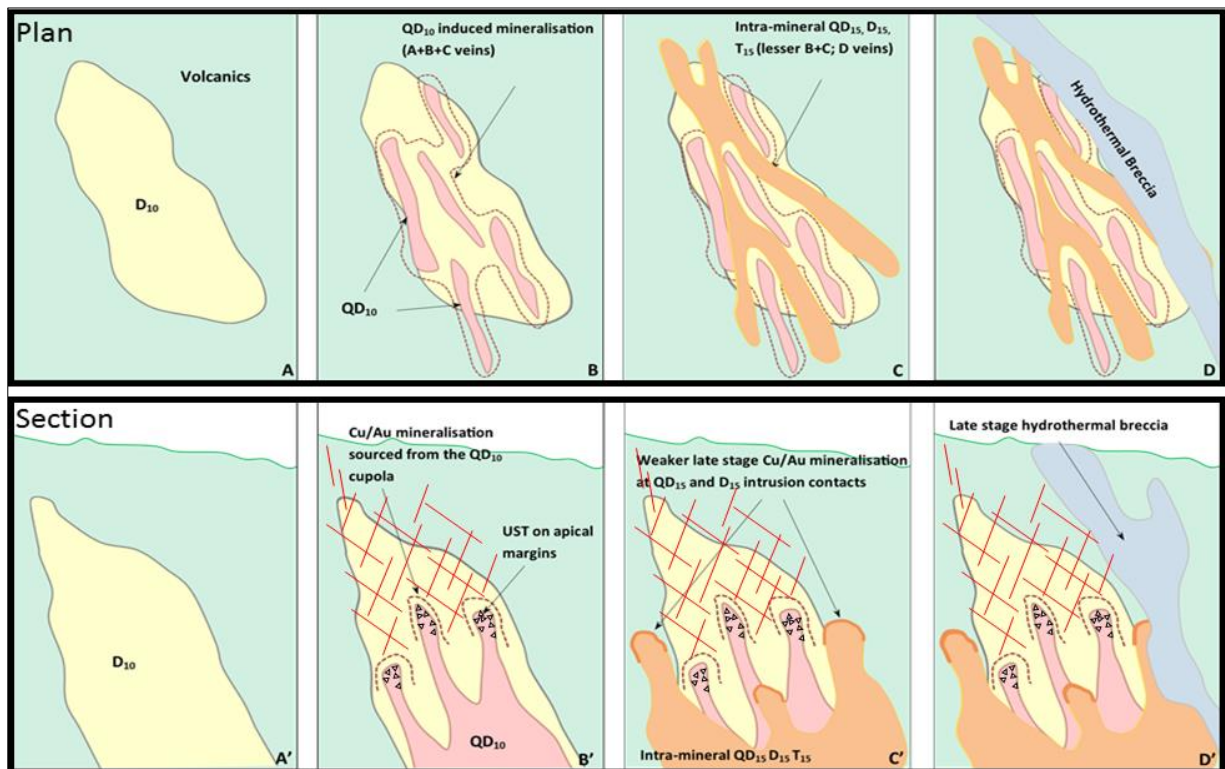

Figure 4: Alpala Genetic Model – schematic evolution of Alpala intrusive phases and associated vein paragenesis.
