

Figure 1: Drill hole location plan, showing copper-percent equivalent results to date and the traces of existing and planned drill holes. The Mineral Resource Estimate Grade shell at >1%CuEq is shown in magenta (**TOP**). NW-SE longitudinal-section (**BOTTOM LEFT**), and NE-SW cross-section (**BOTTOM RIGHT**) through the Alpa Deposit show Inferred block outlines (blue) and “open” areas marked for drill testing in the coming year. The results of the Mineral Resource Estimate released on January 3, 2018 are summarized below:
