

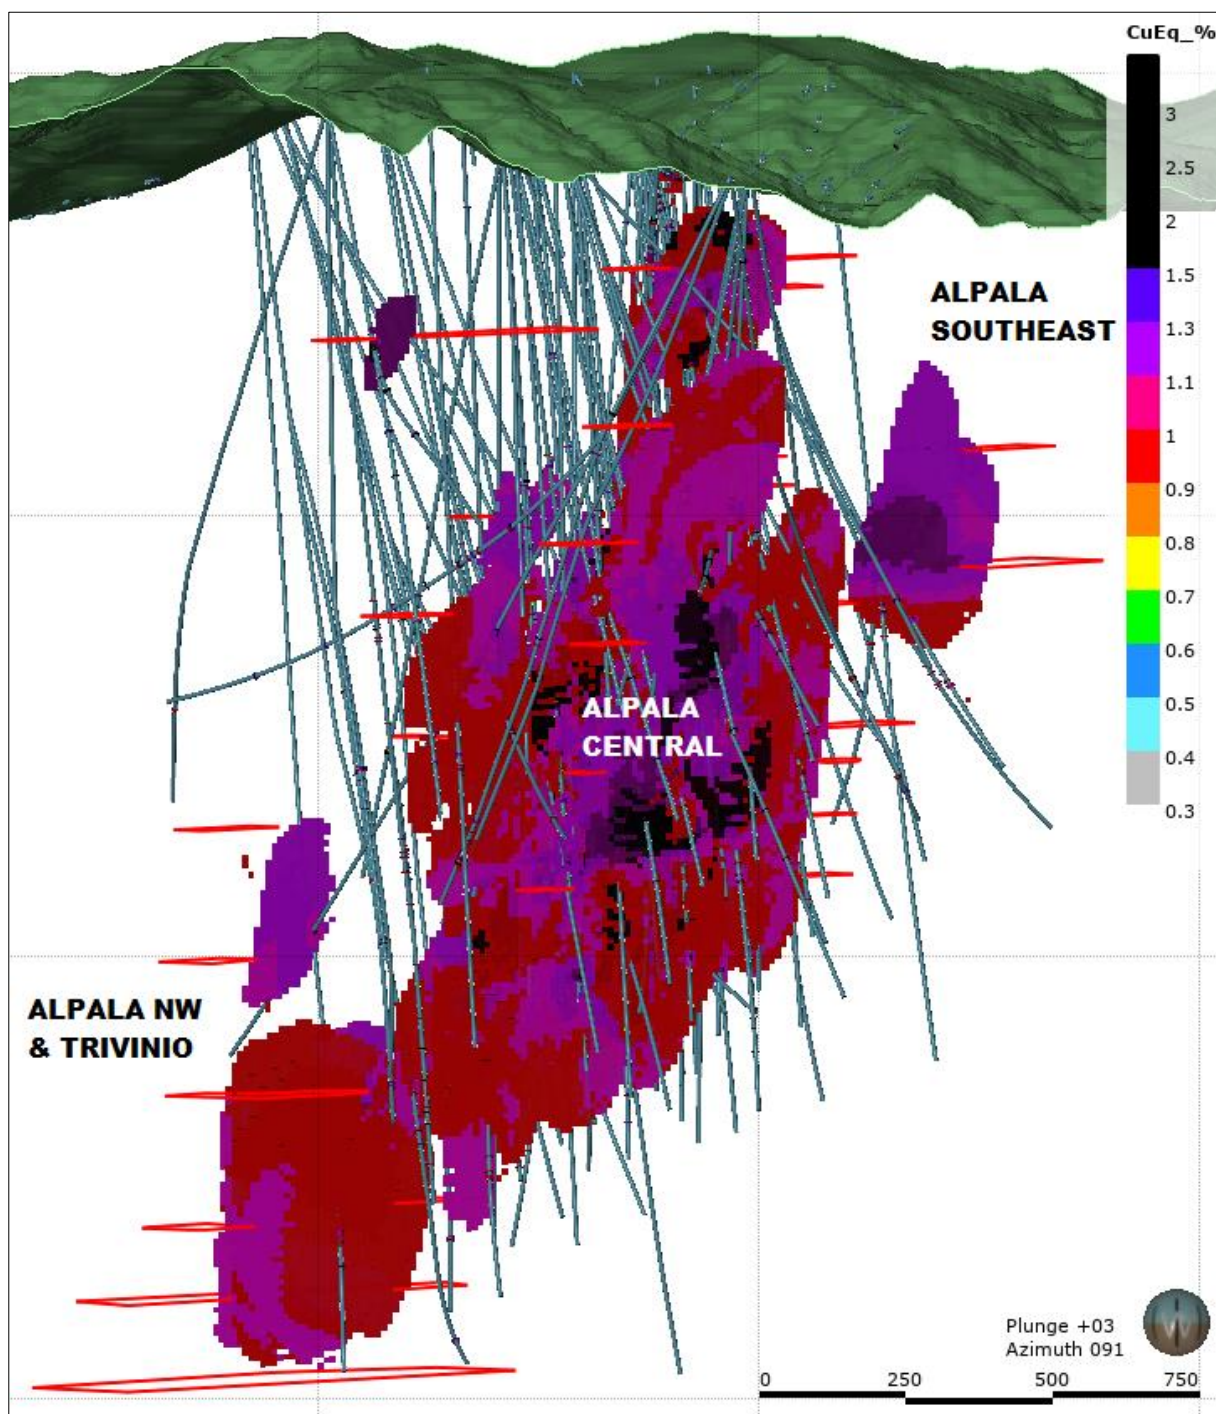

**Figure 1:** Location of Cascabel project in northern Ecuador, highlighting the significant capital advantages held by the project, with proximity to ports, road infrastructure, hydro-electric power stations and the trans-continental power grid.

**Figure 2:** Section view through the Alpa deposit, looking east. High-priority drill targets include planned resource extensions at Alpa SE, Alpa NW, Trivinio and Alpa Central Western Limb for the 2019 drilling campaign ahead. Drill target areas, based on extensions to the existing block model at Alpa, are highlighted by red polygons outside the modeled blocks containing grades of > 0.9% CuEq.
